

Equivariance decays smoothly with rotation angle, symmetric about 180°
radius = RBF CKA, one trace per layer · rotation-augmented models, final epoch, mean over 10 seeds
radial axis is zoomed per panel to the range printed in each title

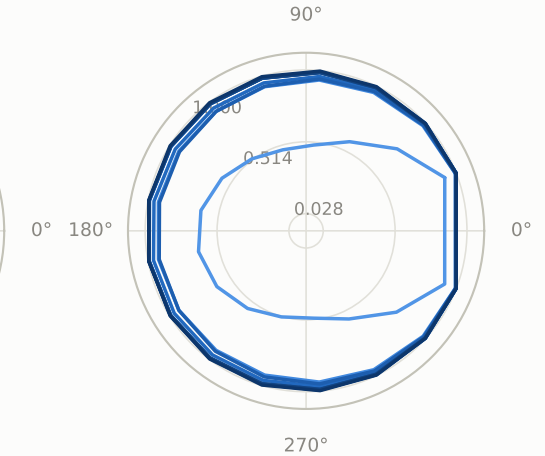

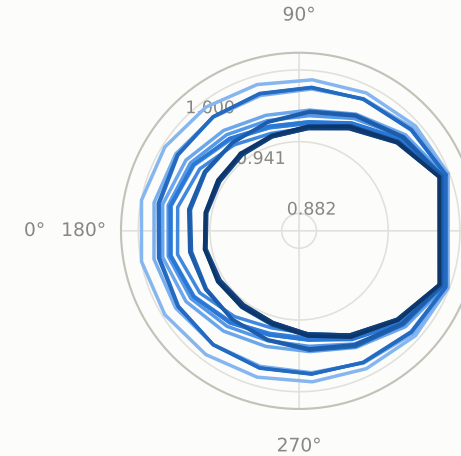

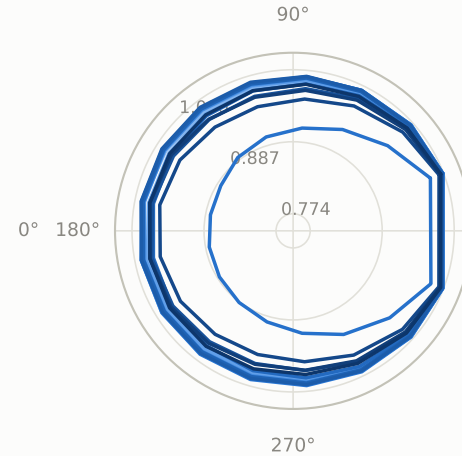

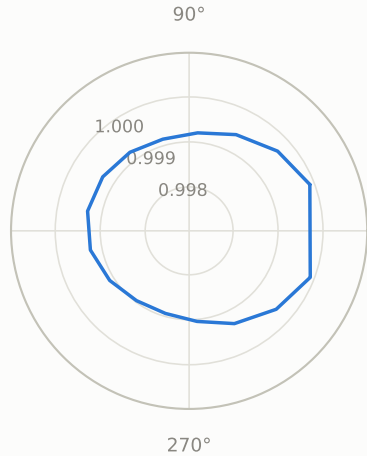

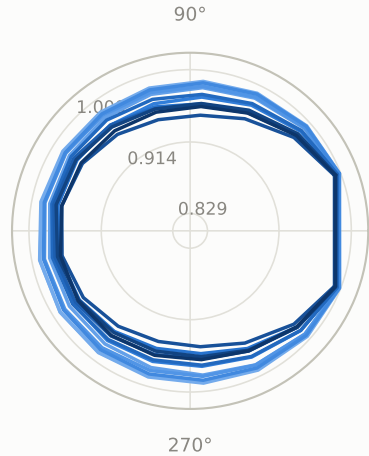

Fluid flow (particles)
mlp / buoyant
CKA 0.829-1.000

Fluid flow (particles)
naive / buoyant
CKA 0.998-1.000

Fluid flow (particles)
pointnet / buoyant
CKA 0.774-1.000

Fluid flow (particles)
pointnet / isotropic
CKA 0.882-1.000

Fluid flow (particles)
transformer / buoyant
CKA 0.028-1.000

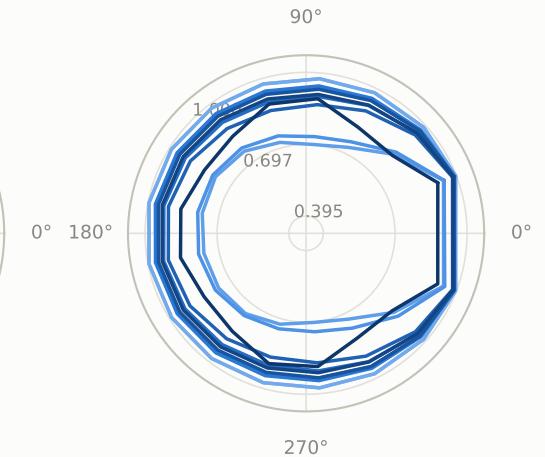

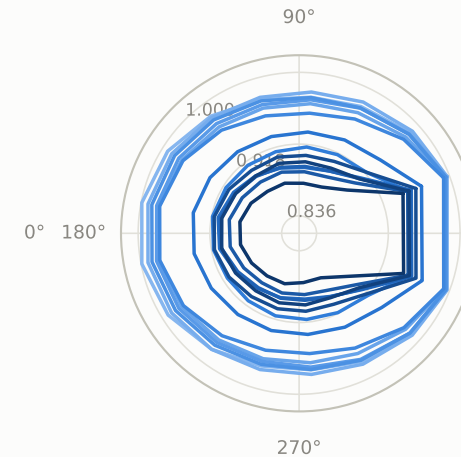

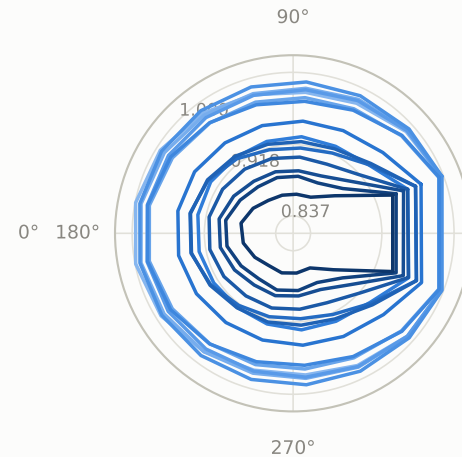

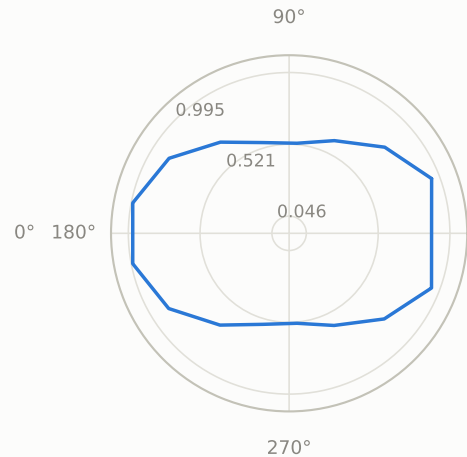

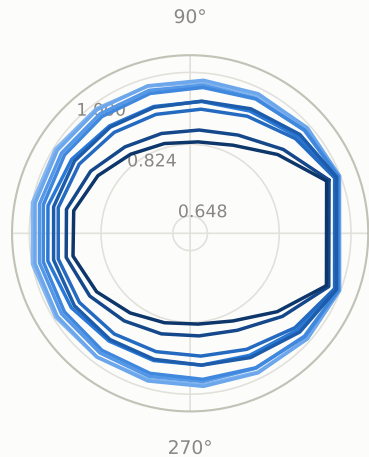

Stress (particles)
mlp / anisotropic
CKA 0.648-1.000

Stress (particles)
naive / anisotropic
CKA 0.046-0.995

Stress (particles)
pointnet / anisotropic
CKA 0.837-1.000

Stress (particles)
pointnet / isotropic
CKA 0.836-1.000

Stress (particles)
transformer / anisotropic
CKA 0.395-1.000
